

ATTENTION PAIN SUFFERERS!

NEW CLASS IV LASER THERAPY IS NOW AVAILABLE AT:

MENA SPINE AND REHAB CENTER!

ASK THE FRONT DESK FOR DETAILS. ☺

HOW IT WORKS?

The TMA Diowave delivers physiological benefits that no other modality can deliver. By stimulating adenosine triphosphate (ATP) production and enhancing cell membrane permeability (along with other effects) Diowave therapy actually helps your injuries heal, rather than just masking the pain. Laser therapy is not a thermal treatment; it is bio-stimulatory from photochemical reactions in cellular tissue. As such, Laser can be used safely over metal implants and for candidates with circulation and neuropathy problems.

THE MOST POWERFUL AND ADVANCED THERAPEUTIC LASERS
Class IV
HIGH POWER LASERS
TECHNOLOGICAL MEDICAL ADVANCEMENTS

Laser Mechanism of Action

Photobiomodulation in Target Tissues

Thermal
↑ Nerve Conduction
↑ Capillary dilation

Biochemical
Releases nitric oxide
↑ ATP production
↑ Fibroblast migration
↑ Macrophage activity
↑ Keratinocyte activity
↑ RNA/DNA synthesis
↑ Enzyme production
↑ SOD production

Bioenergetic
↳ Acupuncture meridian point stimulation

Bioelectric
↑ Electromotive action acting on membrane bound ion channels
↑ Intracellular/extracellular ion gradient changes

CLINICAL EFFECTS
Reduced spasm | Pain Relief | Increased circulation
Improved flexibility and function | Improved healing
Reduced symptoms associated with osteoarthritis

IT WORKS FOR:

- SPORTS INJURIES
- TENNIS ELBOW
- KNEE PAIN
- OSTEO-ARTHRITIS
- CARPAL TUNNEL
- PAINFUL-STIFF JOINTS
- BACK INJURIES
- NECK PAIN
- SOOTHING WARM FEELING.....NON-INVASIVE
- WORKS IMMEDIATELY!!!!!!
